Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	Change, CompoundInterest	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
Change: The user will input a dollar amount to be converted into coins.	The program divides input by coin value, the remainder is divided among smaller coins until only pennies are left.	The screen displays coins divided among appropriate groups.
CompoundInterest: User inputs principal (P), period (M), interest rate (R), and compounding frequency (F)	Calculates final value with formula: $P(1 + R / F)^{FM}$	The screen displays final monetary value after the period.
